

PLASMA DONAR APPLICATION – PROBLEM STATEMENTS

Team ID : PNT2022TMID39818

PROBLEM STATEMENT: The problem definition of the system is to launch an online interaction medium for the blood/Plasma donation management.

The main aim of this project is to help the people who needs blood/Plasma in emergency and to associate some donors who are willing to donate their blood/Plasma to needy people and save their lives.

SOLUTION:

- ❖ Search donors of suitable donar and contact them if needed.
- ❖ Donate blood by registering themselves with our system and can also become donors.
- ❖ Will be able to see the stock of various blood groups and plasma being obtained.
- ❖ Send request via “contact us” to get information’s.
- ❖ Get information about all the blood campaigns and awareness.

PROBLEM STATEMENT: Whenever the requirement of plasma can be occurs then the necessary awareness steps to taken and need to know the how to handle the software applications.

SOLUTION:

- ❖ Scarcity of rare blood group.. Unavailability of blood during emergency..
Less awareness among people about blood donation and blood transfusion.
Deaths due to lack of blood during operations.
- ❖ The Blood Bank Management System project aims to make all the procedures automated and therefore with computer system it can be more fast and accurate..
- ❖ This project is a high quality software to manage all these cumbersome jobs.
